Take-Home Assignment: Product Manager

Assignment Tasks

1. Google Analytics

From a **user experience point of view**, we want to evaluate **Offers Page**

This product is accessible mainly through the **Gift Icon,** but not limited through that. There are various entry points where you land on the Offers Homepage.
This product serves as a **centralized hub for offers**, helping players easily discover and navigate all available promotions — effectively acting as a **one-stop shop** for rewards and incentives.

Google Analytics can give us a hint or two with regards to **Offers Page performance.**

- Define what kind of events, kpis or funnels we can monitor, so we can extract valuable insights for the Product Team.
- Provide some reports, for illustrative reasons. (maybe using some random numbers)
- What success looks like for this product? Can you explain?
- Are there additional KPIs that, combined with your suggestions above,enhance our decision making strategy?

Please check the following:

The relevant google sheet file (*Offers Page for THA*) with two tabs; Screenshots *Desktop and Apps* in an illustrative way depicted how the player can browse through Offers Page and eventually choose a game or an offer.
For extra tips, you can visit the Novibet site, based on your residency.
(*for MX, https://www.novibet.mx/casino*)

2. Data Analysis & Product Insights

Now, from a **more product point of view**, we want to evaluate how **Sportsbook Missions**, one of *our most engaging mechanics*, is performing.

This product aims to **motivate players to place a bet** and they will get **rewarded regardless** if they win or lose.
We bring 13-weeks data from Mexico.

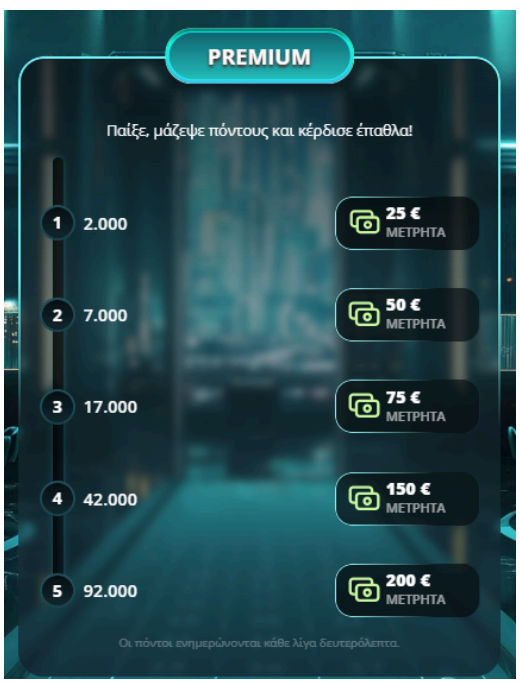
- Create some reports where you can demonstrate your analytical thinking.
- How are Missions performing? Is there any pain point spotted from the data?
- Provide additional KPIs that can be explored to enhance our decision making strategy.
- What success looks like? Can you explain?
- Can you provide any product improvement based on your data?

- If you were responsible to consult the product team for next steps, what would you say? How would you respond if you were asked to drop the Missions product?

Please check the following:
The relevant google sheet file (*Sportsbook Missions for THA*) with 4 tabs. Definitions, *Conversion, Customer Base, Category*
For extra tips, you can visit the Novibet site, based on your residency.
(*for MX, https://www.novibet.mx/apuestas-deportivas*)

3. How to?

In Novibet, we launched a **Casino Loyalty program** in January 2025.
It is a way of rewarding our players, whenever they launch and play a game.
There is **no *requirement for the player (like opt-in)*** - he/she instantly receives coins based on their activity.
The player starts with 0 coins and there is no competition among the players.
These coins can be automatically redeemed based on the below tables.
The “Premium” is a one-off stage; the player receives rewards as soon as a milestone is reached.
The “VIP” is a monthly recurring stage; the player receives rewards by the end of month, based on his/her highest milestone achieved during each month.
The player will complete the “Premium” stage, before moving to the “VIP” stage.



(*there is no need to focus so much on the numerics*)

The Product Analytics team has been requested to **assess if the Casino Loyalty program is successful** or not, until now (End of August 2025).
You are responsible to compile a concrete analysis depicting the as is performance of this casino loyalty.

- How would you frame the analysis?
- Explain the **perimeter of your analysis** e.g. time period, customer segment, etc
- Feel free to provide any visuals, if necessary.

For extra tips, you can visit the Novibet site, based on your residency.
(*for MX, https://www.novibet.mx/casino/loyalty-program*)

4. North Star Metric Framework

The way we evaluate the performance of our products is through the **NSM framework**.
NSM stands for **North Star Metric**; we can have multiple metrics to evaluate a product, but you need to choose ***one metric that best reflects whether the product is truly growing and delivering value.***

- **Propose** a NSM for one of the above mentioned products (*Offers Page, Sportsbook Missions, Casino Loyalty*)
- **Explain** your rationale and for choosing this metric
- **Identify** 3-4 additional, secondary metrics that can either influence the NSM or cover another dimension of success for the product
- **Describe** the way you can actually use this NSM framework to guide product decisions and prioritize initiatives.

Deliverables

- A report (PDF or PowerPoint) containing your analysis, visualizations and recommendations for all tasks
- Additional files used in your analysis (e.g., Excel spreadsheets).
- A brief (max 500 words) reflection on your approach, assumptions, and areas for further exploration.

Evaluation Criteria

- Simplicity (above all)
- Depth and accuracy of data analysis
- Quality and clarity of visualizations
- Understanding the application of the North Star Metric framework
- Ability to connect data insights to business goals
- Creativity and feasibility of proposed solutions

Time Expectation

Please return your completed assignment within 5 days of receiving it.

Good luck! We look forward to seeing your insights and strategic thinking.
